

Headlands School

Student Council Mission Statement

Headlands School holds the belief that successful education requires active participation from staff, students and governors of the school, parents and guardians in the home, and members of the community. We believe that effective relationships are promoted through consultation, collaboration and open communication.

Purpose of the Student Council

The purpose of our Student Council is to encourage students to get involved in issues that concern them in and around school. As a council we focus on listening to the views of students and we take responsibility for some aspects of school life.

Aims

Having a Headlands School Student Council helps us to improve aspects of our school community by exercising our rights and accepting our responsibilities. Our discussions and decisions will help to inform improvements to the school environment and our learning.

Organisation

The council draws representatives from each of the tutor groups in Year 7 to 11 and these are complemented by the Senior Student Leadership Team. As we seek to enrich the learning and school experience of all those who attend Headlands School we also hope to engage directly with the wider Headlands School student community, including those in other primary schools.

On a half termly basis, the Student Council will usually meet to discuss the following areas: Teaching and Learning; Student Support; The Community and Extra-Curricular; Curriculum.

The Student Council is led by Mrs Bone (Headteacher).
