

Year 7- Geography Skills	Emerging	Developing	Secure	Excelling
<u>GS1</u> <u>Geographical Knowledge and Understanding</u>	-Recall of basic or generalised geographical facts and information about places, environments, concepts and locations. -Limited knowledge of physical landscapes and basic understanding of some processes. -Basic awareness of human interactions with the world. -Can identify basic links between the human and physical world.	-Recall of numerous geographical facts and information about places, environments, concepts and locations at 2 or more scales. -General knowledge of physical landforms and processes. -General awareness of human interactions with the world we live in. -Can identify and describe one or two links between the physical and human world.	-Recall of a wider range of geographical facts and information about places, environments, concepts and locations at a range of scales. -Good knowledge and understanding of physical landforms and processes. -Good knowledge of human interactions with the physical world. -Explains some ways that human activities cause environments to change.	-Accurate recall of geographical facts and information about places, environments, concepts and locations at an increasingly broad range of scales. -Strong Knowledge and understanding of physical landforms and how they have been created. -Strong knowledge and understanding of human interactions with and use of the physical world. -Detailed explanation of the ways in which human activities cause environments to change both positively and negatively.
<u>GS2</u> <u>Geographical Communication</u>	-Descriptions are very basic. -No PEE evident in explanations. Answers make comments which begin to address the question but they are not developed. -Work may consist of basic sentences, lists or bullet points.	-Descriptions are clear but lack detail. -Inconsistent and limited use of PEE in explanations. Evidence provided in parts but no meaningful explanation. -Work is written in sentences with basic punctuation. -Limited or no judgements are made where they are asked for.	-Descriptions are detailed and accurate. -Structured use of paragraphing and PEE with guidance. Some evidence and explanation provided but not fully developed. -Work is clearly and correctly paragraphed. -Where they are asked for, limited judgements are made but are unsupported and lack balance. -Some attempt at categorisation of information (SEE, P/S impacts, ST/LT responses)	-Increasingly effective use of paragraphing and PEE independently. Explanations are reasonably well developed. -Where appropriate, basic introductions and conclusions are used in extended writing. -Where asked for, judgements are made and are beginning to be supported but lack clarity or extension. -Increasing categorisation of information (SEE, P/S impacts, ST/LT responses)
<u>GS3</u> <u>Geographical Skills</u>	<u>Beginning to master basic geographical skills</u> -Some attempts to use basic geographical terms. -Can identify 4 point compass directions, use of 4 figure grid references with guidance. -Can use the map key with direction. -Can use an atlas to locate the continents. -Can draw simple graphs/charts (ie bar and line graphs) with some inaccuracies.	<u>Precise use of basic geographical skills.</u> -Some use of basic geographical words. -Can identify 8 point compass directions, independent use of 4 figure grid references. Beginning to use 6 figure grid references with guidance. -Uses the map key to identify significant features. Can use an atlas with support to locate countries and describe basic location -Can draw and interpret simple graphs/charts (ie bar and line graphs) independently.	<u>Beginning to master moderately difficult skills.</u> -Uses a broader range of geographical words. -Can use 4 figure and 6 figure grid references independently. Begins to use other map skills such as measuring straight line and curved line distances but these lack accuracy. -Can with guidance use an atlas to locate countries and give detailed explanation of location which may include latitude and longitude. -Can draw and interpret moderately complicated graphs and charts (ie divided bar, histograms, climate graphs with guidance or some inaccuracies.	<u>Precise use of moderately difficult geographical skills</u> -Regular use of a range of appropriate geographical words. -Can use 4 figure and 6 figure grid references independently. Can use other map skills such as measuring straight line and curved line distances with accuracy. May begin to use most complex map skills such as using contours to work out relief with limited accuracy or with guidance. -Can with guidance use the atlas to investigate physical and human geography of a country. -Can draw and interpret moderately complicated graphs and charts (ie divided bar, histograms, climate graphs, choropleth maps) accurately and independently.

Year 7
