Notes:

1. This document shows the sequencing at KS4 and KS5 for those requiring curriculum catch up due to Covid 19 issues.
2. For more detailed current sequencing for KS4, see current KS4 overview document. This includes details for all current GCSE groups, some of who are split between two teachers and therefore have slight amendments to this in terms of sequencing delivery.
3. Future long term planning for KS4 and KS5 is available in a separate document.
