Learning Outcomes	Students begin to grow by becoming aware of the sources of help available to them				
	and begin to understand that learning, skills, qualifications and knowledge of the				
	labour market are important for lifelong success. Students start to explore the range				
	of possible jobs and the main learning pathways available to them. Through STEM				
	activities, students become aware of the opportunities available to them in within				

	science and technology industries. Through the PSHE and the whole school curriculum, students begin to develop an awareness of heritage and values and have opportunities to develop friendships and relationships with others. During PSHE and tutor, students develop an awareness of money and how to be a positive member of the community while understanding British Values, rights and responsibilities, prejudice and stereotypes. Students are encouraged to take initiative in their learning and there is the ethos of the importance of physical and mental wellbeing. Students develop their ability to learn from setbacks and challenges.

Learning Outcomes	 NextGen Leaders Along with building on previous careers learning, students really look forward to the future as they continue their transition through the school and prepare to choose their GCSEs. Subject teachers, tutors and the range of careers activities are focused on helping students make positive choices for GCSE that align with their aspirations. Students become more aware that different jobs and careers bring different challenges and rewards and that to be successful, they need to be imaginative and flexible. 1:1 personal guidance meetings really start to focus students on future aspirations and the steps required.

Learning Outcomes	responsibility in planning their pathway for the future while considering the risks and rewards. As part of the work experience programme, students challenge themselves to try new things and consider what jobs and roles they find interesting along with what might be available to them in the labour market. Through the opportunities available to students and their own research (including communicating with family and employers/employees), they become much more reflective on their experiences, learning and future pathways. They develop a knowledge of rights and responsibilities in the workplace and society and reflect on their physical and mental well-being.

Learning Outcomes	The sixth form careers programme builds on prior learning by equipping students with the knowledge, skills and experiences needed to make informed choices about their future. It supports them to take responsibility for their learning, reflect on their achievements and set ambitious goals. Students are encouraged to plan their next steps in education and work, explore labour market information, research pathways and qualifications, and understand workplace expectations and recruitment processes. The programme also promotes resilience, confidence and leadership, while helping students to develop networks and consider entrepreneurial opportunities. Alongside this, it emphasises the importance of balancing work, life, wellbeing and finances, and encourages students to reflect on heritage, identity and values when shaping their career direction. They are supported to recognise rights and responsibilities in the workplace, challenge prejudice and discrimination, and critically assess information sources. Finally, the programme helps students to understand how careers are influenced by wider factors, including technology, science, the environment, politics, the economy and society, preparing them to transition successfully into life beyond school.
